OBJECTIVE

Computer Science B.Tech graduate with hands-on experience in Linux fundamentals, AWS/cloud concepts, Docker, CI/CD, networking, and application development. Strong foundation in operating systems, system troubleshooting, databases, and secure application environments. Experienced in building academic projects while applying automation, problem-solving, and documentation practices. Seeking an entry-level technology role to contribute technical skills and grow expertise across software, cloud, infrastructure, DevOps, and IT environments.

SKILLS

Programming Languages	Java, Python, HTML, CSS, JavaScript
Frameworks/Libraries	React.js, Django, Node.js, Scikit-learn, Streamlit
Databases	MySQL, SQLite, MongoDB
DevOps	Git/GitHub, Docker, Jenkins, CI/CD, Pipelines, Linux (Basics)
Academic Coursework	Data Structures, Operating Systems (Windows, Unix/Linux), OOP, DBMS

PROJECTS

CYBERVISOR-X: AI-Driven Cybersecurity Threat Intelligence and Access Control System

- Developed an AI-based cybersecurity threat intelligence platform using React.js, Node.js, and Express with a multi-agent architecture for real-time threat detection, risk analysis, and automated mitigation reporting.
- Integrated OTP-based authentication, role-based access control, MITRE ATT&CK-based threat classification, and severity-level analysis for secure user and threat management.
- Built an interactive real-time dashboard to display threat trends, risk scores, and system activities for cybersecurity monitoring.

WorkForce Insights: AI-Powered Employee Churn Prediction

- Developed an employee attrition prediction application using Python, Scikit-learn, and Streamlit with real HR datasets.
- Trained Logistic Regression, Random Forest, and XGBoost models to identify employee attrition risks.
- Built an interactive dashboard supporting data upload, real-time predictions, and visual insights for churn analysis.

Online Voting System: Secure Web-Based Digital Voting Platform

- Built a secure online voting platform using Django, Python, JavaScript, and SQL with user authentication, role-based access, and an admin dashboard for managing 15+ polls.
- Designed optimized SQL schemas to support secure and accurate vote storage.
- Implemented a responsive HTML/CSS interface for reliable and user-friendly voting operations.

EDUCATION

B.Tech in Computer Science , MallaReddy University, Hyderabad	2022 - 2026
CGPA: 9.39/10	Hyderabad

Intermediate (MPC) , Narayana Junior College	2020 - 2022
Percentage: 90.4%	Hyderabad

School , Sri Chaitanya Techno School	2019
CGPA: 9.8/10	Hyderabad

EXTRA-CURRICULAR ACTIVITIES

- Smart India Hackathon 2023 – Competed and engineered a smartwatch prototype with on-device BMI tracking and activity detection, delivering real-time wellness insights during judging demos.
- Salesforce Trailhead – Earned 15 badges and 17,375 points by completing modules on CRM, App Customization, and Process Automation, achieving Adventurer status in 2024.
